You should create a single zip file or folder containing all files. **The name of the folder should be 36i_ followed by the paper number assigned.**

Checklist (required files for each submission)

Zip file to include:

1. PDF of complete paper as it is intended to be read

2. How to Name the Files:

Files should begin with the paper number that was assigned by SEM, followed by an underscore (_), and ending with the first three (3) letters of the corresponding author's last (family) name. **For example, a paper submitted by Dr. Proulx and assigned paper number 467 would use the following file name: 467_pro.pdf.**

Figure files should follow the same format and end with the Figure number. **For example, Figure 1 in a paper submitted by Dr. Proulx and assigned paper number 467 would use the following file name: 467_pro_Fig1.eps.**

3. File Formats Accepted:

Text files should be in Microsoft Word. If you cannot submit as a Word document, we can accept LaTeX files as well. **We cannot supply a template for such files.**

You will then see "Your Submitted Paper(s) for IMAC", click on the title of the paper, this will bring you to the Edit/Upload Files for said paper. Before you upload your files at the bottom of this page, you **must** update any information that may have changed since your initial submission i.e. Title, Abstract, Authors (**authors must be listed in the order they are on your final paper**). Otherwise the information in the Final Conference Program will not be updated.

If you make any changes or upload any files you **must click Update Abstract**. The page will “refresh” then you will see **Your Abstract Updated Successfully**. If you have any questions, please contact Shari Matthews (shari@sem1.com or 203-790-6373).

5. Comments on the Preparation of PDF Files:

Please pay attention to the following details when preparing your PDF files.

- a. Select “Print Optimized” (NOT “screen” or “press”).
- b. DO NOT “down sample” or print to “screen image.”
- c. Security should be set to “None” with no password protection.
- d. All fonts should be embedded.
- e. Graphics should be in the final printing resolution, i.e. photos at least 300 dpi, line drawings should be 600 dpi.
- f. Graphics should be placed in the word processing application at their final size and resolution. Do not place the graphic in the word processing application and then reduce. Reduce the size of the image in its original file and then place it. This will minimize the file size of the final paper.
- g. Final PDF files should not exceed 10 MB.
